

Description		
Title:	Giessen long-term field experiment 'biological nitrogen fixation' - soil organic carbon content	
Title (German):	Giessener Langzeitversuch zur biologischen Stickstoffgewinnung -organischer Kohlenstoff im Boden	
Abstract:	This data set reports the soil organic carbon content from the Giessen long-term field experiment 'biological nitrogen fixation'. The experiment and data are described in Hobley et al. 'Decoupling of subsoil carbon and nitrogen dynamics after long-term crop rotation and fertilization ', 2018, Agriculture, Ecosystems and Environment. https://doi.org/10.1016/j.agee.2018.06.021	
Abstract Type:	Abstract	
Abstract (German):	Dieser Datensatz berichtet den Gehalt an organischen Kohlenstoff in den Bodenproben aus dem Langzeitversuch in Giessen zur biologischen Stickstoffgewinnung. Der Versuchsaufbau und der Datensatz sind in Hobley et al. 'Decoupling of subsoil carbon and nitrogen dynamics after long-term crop rotation and fertilization ', 2018, Agriculture, Ecosystems and Environment, https://doi.org/10.1016/j.agee.2018.06.021 , beschrieben.

Quality		
Lineage statement:	Sample information was recorded by S. Bauke and M. Gocke (University of Bonn) in the field. Soil organic C was analysed by M. Henn and E Hobley at TU Munich. Data was processed and cross-checked by E. Hobley at TU Munich.	
Conformity result:	Passed:	passed
	Specification:	Internal
	Date:	2018/07/03
	Date type:	revision
	Explanation:	Research data are conform to internal quality standards.

Attribute:	Table name:	soil3. ID_8007_171206_Gi_b_Soil3_TUM_SOC
	Column name:	SOC
	Long name:	Soil organic carbon content
	Description:	Soil organic carbon content
	Unit:	g per 100 g (%)
	Methods:	Soil carbon was analysed by dry combustino on ground samples. Inorganic C was determined by calcimetry. No inorganic C was found in any sample. Organic C is therefore equal to total C.
